SAFETY INSTRUCTIONS

This device contains high voltage electricity. To avoid the risk of electric shock, please do not remove the device cover. If you encounter a problem, please contact one of our authorized service centers.

Any change or incorrect setting of the LED Display can result in electric shock. Do not open the device for maintenance or repair; do not modify the device's equipment; or allow unqualified people to intervene with it. If you encounter any problems, please contact one of our authorized service centers

Precautions Against Permanent Screen Damage

Images remaining still on the screen for more than 2 hours will cause permanent screen damage. Therefore, when using the device, keep the pause times as short as possible and switch off the device if there is a possibility of a prolonged pause. You can also adjust the "Brightness" and "Contrast" settings to lower levels in the event of a pause.

WARNING!

The "exclamation mark in an equilateral triangle" reminds the user of important operating and maintenance (servicing) instructions that must be followed when using the appliance in question.

The "lightning bolt with arrow" or "broken arrow" sign in an equilateral triangle warns the user of the presence of an uninsulated "dangerous voltage" level in the vicinity of the appliance which, if contacted, could pose a hazard to humans.

1. Please read this user guide carefully before using the LED Display and keep it for future reference. If the device is given to another person, give the operating instructions along with the device.
2. Unpack the device and check that there is no damage to the device, its accessories, or the cable. In case of any damage, breakage, or cracks on the device or the cable, or if the accessories are damaged or missing, do not use the device and contact your nearest authorized service center.
3. Plastic bags are extremely dangerous for children and babies. Never allow children and babies to play with the nylon plastic bags of the device or its accessories. Do not leave nylon plastic bags near children and babies.
4. To avoid the risk of fire and electric shock, do not use the appliance in excessively humid and damp conditions or near places with water such as bathrooms, bathtubs, sinks or swimming pools.
5. Do not leave the device in precipitation (exposed to rain, snow, or wind), where water may be splashed or spilled, or in a position where the device may fall into water. Make sure that no water or other liquid gets on the device. Vases, jugs, and other containers filled with water or other liquids should not be placed near the device. Do not use the device in environments where it may be exposed to water vapor or moisture, as well as around humidifiers.
6. Keep the LED display away from all heat sources, such as stoves, radiators, electric stoves, etc., and devices that generate magnetic fields. Do not leave the device or its remote control in the vicinity of flames, fire or liquid sources, or objects that may pose a hazard to avoid the risk of fire or damage to the device.
7. Keep the device, remote-control, remote-control batteries, and other accessories away from direct sunlight and heat sources. Before plugging the device into an electrical outlet, make other connections and make sure that all connections are made correctly.
8. Before making any connections, turn off the device and disconnect the power cord. Before installation, maintenance, cleaning or transportation, unplug the device from the power outlet.
9. Before connecting the device's power plug, ensure that the electrical

network is suitable for the values specified on the device (AC 100-240V-50/60HZ) and that the line is protected with a suitable fuse. Even if the power switch, if any, is turned off, the device must not be disconnected from the power supply unless the power plug is removed from the socket.

10. Insert the power plug into a socket located at the back of the device so that the cord is not stepped on and is easily accessible when needed.
11. Make sure that the power plug is fully inserted into the socket. Make sure that there is no water, moisture or dust in the inlet of the power plug and socket.
12. It is the responsibility of the consumer to ensure that the electrical network for the device is suitable and that it is installed by a qualified electrician. The manufacturer cannot be held responsible for any damage to the device caused by the use of the device in electrical networks that do not comply with local regulations.
13. Never use broken or deformed electrical sockets. Remove the power plug from the socket by holding the plug, do not pull by the cord. Do not leave the power cord of the device under or on objects such as carpets or rugs where it can be stepped on, and avoid crushing the power cord. If the power cable is damaged, do not use the device and contact an authorized service center.
14. Do not use an extension cord or socket group to operate more than one high-power electrical device in the same socket. Overloading the power outlet can cause fire and electric shock. If an extension cable is required, make sure it meets the device's specifications.
15. Do not overtwist, knot, connect, or coil the device's power cable to other connecting cables or the power cables of other devices.
16. Do not leave the power cord of the appliance on wet or hot surfaces, and keep it out of the reach of children.
17. Never open the back cover of the device and do not attempt to modify the equipment. The device contains non-isolated hazardous voltage, which could result in electric shock and other life-threatening hazards.
18. Only use original and manufacturer-authorized accessories with the device.

19. Make sure that no part of the device, particularly the screen, has been hit or broken. Impact to the device or the screen may cause malfunction of the device and serious injury.
20. Be careful not to scratch the screen. Hard or sharp objects can easily damage the screen. Also, do not apply excessive pressure to the screen with your hand or any other object.
21. Place the device on a hard, level surface that can support its weight; never place it on a slanted surface. Use only the stand, mounting bracket, or other accessories supplied with the device or recommended by the manufacturer to prevent possible tipping. Only mount the LED display on the wall or ceiling as recommended.
22. Unplug the device from the mains socket during thunderstorms, heavy rain, and when it will not be used for a long period of time.
23. Never cover the device. Do not cover the ventilation holes of the device with cloths, newspapers, etc. Allow at least 10 cm of ventilation space on the back, sides, and top of the device.
24. Do not use the device in potentially hazardous or poorly ventilated areas. Do not use the device in narrow and closed spaces such as shelves and display cases, without proper ventilation.
25. Do not place any objects on the device.
26. Do not allow any solid or liquid substances to enter through the ventilation holes on the device. Metal objects and liquids, in particular, pose a risk of short circuiting or electric shock, as well as device damage and fire. If solid or liquid substances get into the device, immediately disconnect the power plug from the socket and do not operate the device again until it has been checked by an authorized service center.
27. The device is intended for home use. Do not use the device outside. Use the device only for its intended purpose; do not use it for industrial or commercial purposes.
28. The manufacturer is not responsible for any malfunction or damage caused by improper or incorrect use.

29. The following are some general rules to follow when using any electrical device.
30. Never touch the device and the power cord with wet or damp hands.
31. Never leave the device out in the rain, near water, in extremely humid environments, or in direct sunlight.
32. Inspect the device and the power cable for damage on a regular basis.
33. Before cleaning the device, turn it off and remove the power plug from the socket. Clean the device periodically. Wipe the device down with a slightly damp soft cloth and then dry with a dry soft cloth. Do not spray cleaning agents on the device, immerse it in water or other liquids, or pour water or other liquids on it. Do not use abrasive materials to scrape the device's surface.
34. Do not pour or spray any liquid on the screen for cleaning purposes. Do not use excessive pressure on the screen during cleaning. Otherwise, it may cause scratches on the screen and image distortion.
35. Do not leave the device running and walk away from it for an extended period of time. When not in use, turn off the device and remove the power plug from the socket.
36. Do not allow small children to use or play with the device. Do not leave the device running in the presence of children, and walk away from them. Do not allow children to come into contact with the device while it is working.
37. Do not allow small children to play with the remote control or other accessories, and keep the remote control and other accessories out of the reach of children. Swallowing remote control batteries or small accessories can be life-threatening. In case of battery swallowing, contact a health care provider immediately.
38. Do not use the device near or in the presence of flammable, combustible, or explosive materials. Make sure there is no gasoline, thinner, alcohol, paint, or any other flammable or combustible material in the area where the device will be used.
39. Do not use the device in excessively dusty environments where hot particles or sparks may enter the device.

40. When using the device with headphones, make sure that the volume is not too high. High levels of noise can result in temporary or permanent hearing loss.
41. Watching a screen in darkness or low light can cause eye strain. It is recommended that the screen be watched at an appropriate light level.
42. The USB terminal of the device must not be loaded with currents higher than 0.5 A (500 mA).
43. When the device is watched from different angles, the color and brightness of the image may differ. This is normal and does not indicate a problem with the device.
44. On the screen, small black and/or brightly colored dots up to 1 ppm in size may be present. These points do not indicate that the product is defective and do not affect its performance or reliability.
45. Do not mix old and new batteries, as well as batteries from different brands, models, and types. Replace dead batteries with new ones of the same size and capacity.
46. Dead batteries should be disposed of in accordance with local laws and regulations and should not be thrown away with other household waste.
47. If the device is struck or damaged in any way, if foreign objects enter the device, or if odors or smoke emanate from the device, immediately disconnect the power plug from the mains and contact an authorized service center.
48. This device is not intended for use by people with physical, sensory, or mental disabilities, inexperienced or uninformed people, or children who are not supervised by an adult.
49. In the event of damage to the power cable, never use the device, do not attempt to replace the cable yourself, or allow unauthorized persons to intervene with the device. The power cable must be replaced with a suitable cable by an authorized service center.
50. If the device is damaged or malfunctioning, immediately turn it off and remove power plug from the socket. Do not use damaged devices. Never

open the device cover, attempt to repair the device yourself, or allow unauthorized persons to intervene with the device without contacting an authorized service center.

51. Do not allow small children to play with the remote control and remote control batteries, and keep the remote control out of the reach of children. Swallowing remote control batteries or accessories can be life-threatening. In case of battery swallowing, contact a health care provider immediately.

Matters to be Considered During Transportation and Shipping:

1. Transport the device in its original packaging and protective accessories.
2. During handling or transportation, do not allow the device to fall, be crushed, or be hit in any way. Do not use the device if it has been dropped or hit, and contact an authorized service center.

Precautions Against Permanent Screen Damage

Images remaining still on the screen for more than 2 hours may cause permanent screen damage. Therefore, when using the device, keep the pause times as short as possible and switch off the device if there is a possibility of a prolonged pause. You can also adjust the "Brightness" and "Contrast" settings to lower levels in the event of a pause.

Note: All illustrations, diagrams and function descriptions in this manual are for reference only. The manufacturer reserves the right to make changes in product appearance, specifications and functions without prior notice. Please keep in mind that the software may alter the device's functionality.

Please note:

When you use a USB with an external device, if the current is too large, the external equipment will need an external power supply (such as a mobile hard disk or mobile drive).

REMOTE CONTROL

#: To use the button' Press and hold more than 1 second Need to register this Magic Remote first.

POWER(⏻): Turns the TV on or off.

(⏻): You can turn on/off the power of the set-top box by adding the box to universal remote in TV.

LIST: Checking the Channel List.

0#: The QUICK ACCESS edit screen appears.

Number buttons: Choose the channel directly

(...): It displays the additional function on the remote control.

(AD/SAP) #: Second Audio Program.

(Some models may not be supported.)

(🔊 +/-) It adjusts the volume level.

(🔇) Select to turn off the sound from the TV.

(🔇#): Enter the Accessibility menu.

(⏮ ⏭) You can change the program up or down.

(🗣) Check out the recommended contents.

(Recommendation service may not be available depending on the countries you are in.) Push and hold the button while speaking to use the voice recognition function Go to All setting →General AI Service →Voice Recognition help for more voice command

(🏠): Displays the Home menu.

(🏠)#Displays the last used APP, you can also select to close then.

(⚙): Enters the Quick Settings menu.

()#: Enters the All Settings menu.

(): Move to the previous step.

()#: Closes the menu.

GUIDE: Check the program schedule.

(): Selects an input source.

()#: Entering into the Home Dashboard.

() Wheel (ok): press the center button to select, Turn up or down to scroll channels.

Navigation buttons: (Up/Down/Left/Right / / /)

Navigate the menu.

PLAY (): Play while watching media.

PAUSE (): Pause while watching media.

MOVIES: Search Movies. (make sure the Internet connection is normal)

NETFLIX: Access the Netflix interface.

Prime Video: Access the Prime Video interface.

Color Buttons (RED/GREEN/YELLOW/BLUE): Execute the prompt function in specific mode.

HOMEPAGE

Enter the Home page after First Time install

Search

You can search for channels, programmers, movie titles and apps from Smart Hub.

Home Dashboard

You can select or control a device (mobile, external device, Home IoT Devices, etc.) connected to the TV.

For more information, see **Connecting External Devices** Using Home Dashboard in **User Guide**.

TV

Move to the TV input you used recently.

Recents

Move to the recently used app. You can run or close a recently used app in the list provided in the Preview area at the top.

Using Home Dashboard

You can select or control a device (mobile, external device, Home IoT Devices, etc.) connected to the TV.

Press ◀ \ ▶ \ ▼ \ ▲ button to select.

You can check and select the smart device connected with the LG ThinQ app.

Please refer to Connecting External Devices → Connecting Smart Devices in User Guide for more information on the action.

② You can play sound from a smart device connected via Bluetooth.

Please refer to Connecting External Devices → Playing Sound from a Smart Device through the TV's Speakers in User Guide for more information on the action.

③ You can check and select the external device connected through the external input port or network.

④ The currently selected output speaker is displayed, and you can navigate to the output speaker settings screen.

⑤ You can view and select the connected storage device.

⑥ You can check and control the device connected via the Home IoT.

Please refer to Connecting External Devices → Connecting Home IoT Devices in User Guide for more information on the action.

⑦ You can easily control your device by presetting the desired operations.

⑧ **Sign In:** You can log in/out to and from the LG ThinQ account you created on mobile.

Edit: You can edit the name of the device connected to **Inputs** or **Home IoT Devices** or configure the related settings.

⑨ It refreshes the device list.

⑩ Exit the Home Dashboard.

TV Settings

Press MENU button to enter the TV Setting.

Press ◀ / ▶ button to highlight the desired menu icon, and press OK button to select.

Quick Settings

- ① You can set **Picture Mode**.
- ② You can set **Sound Mode**.
- ③ You can choose **Sound Out**.
- ④ You can set **Sleep Timer**.
- ⑤ Move to the **Connection** screen.
- ⑥ You can set more options.
- ⑦ You can add/delete the quick setting items or change their order.

Picture

Press **MENU** button to enter the main menu. Or press ◀ / ▶ button to select **Setting** on the Home page.

Press ▼ / ▲ button to select the Picture.

Press **OK** button to enter the sub-menu.

Press ▼ / ▲ button to select Picture Mode Settings/Aspect Ratio Settings/Energy Saving/Additional Settings.

Press **MENU** or **EXIT** button to quit.

Picture Mode Settings

Highlight the item and press OK button to enter the sub-menu, that shows the picture mode you can choose.

Press ▼ / ▲ button to select Picture Mode /Backlight /Contrast / Brightness/Sharpness/Colour/Tint/Colour Temperature/Advanced Controls/Picture Options/apply to all inputs/Reset.

Picture Mode

Press ▼ / ▲ button to select Vivid/Eco/Cinema/Sports.

Vivid Sharpens the image by increasing the contrast, brightness and sharpness.

ECO The Energy Saver feature changer setting on the TV to reduce power consumption.

Cinema Is suitable for watching TV or movies in a dark room.

Sports Suitable picture for sport games. Sharpens the image of rapid movements such as kicking or throwing a ball.

Backlight / Contrast / Brightness/ Sharpness/ Colour/ Tint / Colour Temperature

Press ▼ / ▲ button to select Backlight/ Contrast/ Brightness/ Sharpness/ Colour/ Tint/ Colour Temperature.

Press ◀ / ▶ button to adjust.

Advanced Controls

Press ▼ / ▲ button to select Advanced Controls.

(Optional) Dynamic Contrast/Dynamic Colour/Gamma

Dynamic Contrast/Dynamic Colour

Press ▼ / ▲ button to select Dynamic Contrast/Dynamic Colour, press OK button to select Off/Low/Medium/ High.

Gamma

Press ▼ / ▲ button to select Gamma, press OK button to select Low/Medium/High 1/High 2.

Picture Options

Press ▼ / ▲ button to select Picture Options.

(Optional: Noise Reduction/ Black Level/Real Cinema)

Noise Reduction

Press ▼ / ▲ button to select Noise Reduction, press OK button to select Off/Low/Medium/High Auto.

Black Level

Adjusts the brightness of the dark parts of images.

Press ▼ / ▲ button to select Black Level, press OK button to select.

Real Cinema

Optimize display for movies.

Press ▼ / ▲ button to select Real Cinema, press OK button to select.

Apply to all inputs

Apply to all inputs Apply the detailed setting values of current picture mode to all inputs or apps.

Press ▼ / ▲ button to select Apply to all inputs.

Reset

If you want to reset the image settings to the factory defaults after configuring the image settings, select reset for each image mode.

Press ▼ / ▲ button to select Reset.

Aspect Ratio Settings

You can change the screen size according to the type of content you are watching.

Press ▼ / ▲ button to select Aspect Ratio/ Just Scan.

Aspect Ratio

Press ▼ / ▲ button to select Aspect Ratio.

(Optional: 16:9/ Original/ Full Wide/ 4:3/ Vertical Zoom/ 4-Way Zoom)

Just Scan

Press ▼ / ▲ button to select Just Scan.

If you turn this feature **On**, you can view the content in the aspect ratio that is in the broadcast signal or content source. If the edge of the screen is not clean, please turn it **Off**

Energy Saving

Reduces power consumption by adjusting screen brightness.

Press ▼ / ▲ button to select Off/Minimum/Medium/Maximum/Screen Off.

Eye Comfort Mode

The color temperature will be adjusted to reduce eye fatigue.

Press ◀ / ▶ button to select Off/On

Sound

Press **MENU** button to enter the main menu. Or press ◀ / ▶ button to select **Setting** on the Home page.

Press ▼ / ▲ button to select the Sound.

Press **OK** button to enter the sub-menu.

Press ▼ / ▲ button to select Sound Mode Settings/Sound Out/Additional Settings. Press **MENU** or **EXIT** button to quit.

Highlight the item and press OK button to enter the sub-menu, that shows the sound mode you can choose.

Press ▼ / ▲ button to select Sound Mode/ Balance/ Virtual Surround Plus/Equalizer/ Reset.

Sound Mode

Press ▼ / ▲ button to select Standard/ Cinema/ Clear Voice III/ Sports/ Music/ Game.

Standard	Optimizes the sound for all types of content.
Cinema	Optimizes the sound for cinemas.
Clear Voice III	Boosts voice clarity.
Sports	Optimizes the sound for sports games.
Music	Enhance the high pitch and reduce the bass. Optimizes
Game	the Optimizes the sound for gameplay.

TROUBLESHOOTING

Problem	Possible Cause	What to do
Device Won't Turn On	Power connection may have been made incorrectly	Make sure your device's power cord is plugged into
	Remote Control is not working	Make sure the batteries in your remote control are properly inserted.
No audio or video	Satellite dish antenna not properly tuned	Satellite dish antenna not properly
	No signal or weak signal	Check the cable connections, connection of LNB and other equipment and/or have the satellite dish adjusted
No Signal alert	Satellite dish antenna not properly tuned	Satellite dish antenna not properly
	LNB is damaged	LNB must be replaced

INFORMATION

In the event that it is understood that the goods are defective, the consumer, in accordance with Article 11 of Law No. 6502 on Consumer Protection, may use one of the rights:

- a) Return from the contract,
 - b) Requesting a discount from the sale price,
 - c) Request free repair of the sold goods,
 - d) Requesting the replacement of the sold product with a defect-free equivalent.
- In disputes arising from the exercise of his/her warranty rights, the consumer may apply to the Consumer Arbitration Committee or the Consumer Court in the place where the consumer has his/her place of residence or where the consumer transaction is made. **Note:** All illustrations, menu images, menu and function descriptions used in this manual are for reference only. The manufacturer reserves the right to change the technical specifications, device appearance and functions, menu appearance and functions, remote control and button functions, input/output connections and locations of the device without prior notice due to software and hardware development.

This sign indicates that waste electrical and electronic equipment should be collected separately. The uncontrolled disposal of devices bearing this marking, along with other household waste, is dangerous because hazardous waste can contaminate water and food supplies, posing a threat to human health and the environment. Devices bearing this mark must be recycled in recycling facilities order to protect human health and the environment and to promote the long-term reuse of material resources. If you have used devices or batteries with this mark that have reached the end of their economic life, please contact recycling organizations or municipalities for safe recycling and follow local procedures.
